

Phantom

Jacopo Foggini

General description:

The pure essential form of the Phantom table with its all-over mirrored surfaces give rise to a timeless object.

The table is constructed in three solid volumes, two bases and a top.

Lightly tapered bases modify angles, streamlining elements and giving harmony to the whole.

The reflective material from which the table is made - natural mirror - expresses delicacy and elegance, a universality of use that, as the name suggests, can be ascribed to a discreet and imperceptible presence, enrobed in its surroundings. Phantom is at once classic and contemporary, perfect in every space.

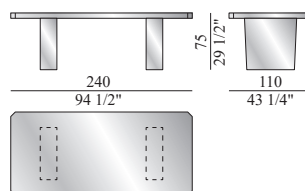

Technical description:

Table constructed in three mirror volumes: two bases and a top. The internal structure is in wood, painted metal grey. Each of the three elements is externally clad in natural mirror. Mirror edges all hand-made with gold detail.
